PROFILE

Computer Systems Engineer focused on FullStack Web Development. Practical experience developing web apps, working under agile methodologies and solving technical problems in collaborative environments.

ABOUT ME

I like well done things and I don't 'cut corners', I believe in doing things right the first time. I like writing clean and robust code. Likewise, I'm passionate about UI/UX design. While the Backend is my favorite part, I deeply value the frontEnd because it allows for great creative freedom and expressiveness. Furthermore, I understand that the presentation is often what the client values the most

TECHNICAL SKILLS

Frameworks & Languages: JavaScript (Base or with Vue or React), HTML5, CSS3 (Base and Bootstrap), Lua, C++.

Tools & BD: Backend (php with Laravel), MySQL (base and with Medoo), Git, GitHub, Postman

Soft Skills: Problem solving, teamwork, adaptability, active listening, self-taught, fast learner:.
